

**Greening Glemsford PC Climate and Nature Group
Report 7th November 2022**

BMSDC Tree planting application 2022/23

The tree planting application (as in last month's report) has been approved. Trees (in pots) will be delivered to LT in late November or early December.

Insulation Surveys

Unfortunately Suffolk Climate Change Partnership has not selected Glemsford as a host 'hub' for a thermal imaging camera, which would have been used to inform households on improving home insulation. The Partnership was looking for towns/villages to receive training then host a camera for their 'pilot run', but there were over 40 applications and only 9 cameras available.

Several members of the working group have signed up for online thermal imaging training with Cambridge Carbon Footprint in the hope we might borrow one of their cameras.

Community Litter Pick

Despite the rain, 21 volunteers turned out to support the litter pick held on Sunday 30th October. Twenty-four bags of rubbish were collected, with Hobbs Lane and Park Lane producing 8 bagfuls plus assorted car parts.
